Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the screen having its reflecting surface **perpendicular to the direction of projection** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The limitation "screen so that its reflecting surface is generally **perpendicular to the direction of projection**" has not been disclosed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 2, 8 and 14 contain the phrase "physical element", "adapted to" and "physical element" respectively. The terms do not allow the exact scope of the claims to be determined and therefore render the claims indefinite.

Claim 2, line 2 contains the phrase "like surface". The term doesn't allow the exact scope of the claim to be determined and therefore renders the claim indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Gale et al (US 5692820).

Re clm 1: A method of employing a display system (Fig 4) for use in a workspace, the method providing a visible image from a computer (Col 7, line 40), wherein a transverse dimension of the image is large compared to a depth (Inherent result of the wide angle lens used in the device, Col 3 line 42), the method comprising the steps of providing a projector (Fig 4), a screen (Col 6, line 56), and the width of the image is maximized (Col 3, lines 40-41).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gale et al (US 5692820) in view of Rohr (US 4708312).

Re clm 2: Gale et al discloses the claimed invention as noted above. However, Gale et al does not disclose supporting the projector on an adjustable support secured to a desk, the support covering less of the surface of the desk than the projector and permitting the projector to be spaced from the screen. Rohr discloses a support (Fig 1) for supporting an apparatus using an adjustable support (Col 1, lines 6-11) secured to a desk (Col 3, line 59), the support covering less of the surface of the desk than the apparatus it supports (Inherent) and permitting the apparatus to be supported in all directions with relative ease (Col 1, line 43). Therefore it would have been obvious to a person of ordinary skill in the art at the time the invention was made to use the support of Rohr to support the projector of Gale et al because it would allow the projector to be supported in all directions with relative ease.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
